Experience

Uber Technologies, Inc

Seattle, WA

Staff Software Engineer, Developer Platform

2017–present

- Tech lead of build team, mentoring tech leads of Java team, Python team and remote cache team
- Tech lead of Go monorepo, owning build system, dependency management, CI pipelines, flaky test management, code coverage, Git sparse checkout etc.
- Technical advisor for SubmitQueue team, proposing new features such as bypassing large diffs and smart jobs scheduling based on ETA, significantly improving the cost and efficiency of SubmitQueue, Uber's implementation of merge queue

Bazel's rules_go and Gazelle

Seattle, WA

Maintainer and Contributor

2021–present

Implemented key features like reporting test timeouts, exporting linter suggestions, decoupling from Google API protos to allow rules_go and Gazelle to evolve independently from Google API, separating interfaces from implementation in compiled archives to improve cache efficiency

Bazel's hermetic_cc_toolchain

Seattle, WA

Maintainer

2023–present

Uber's open source mockgen and its Bazel rule

Seattle, WA

Maintainer

2023–present

Microsoft Corporation

Redmond, WA

Software Engineer, Windows and Devices Group

2015–2017

Building statistical models for the Windows build system, in order to detect abnormal processes, identify factors affecting build time, provide estimates for build time, and propose measures for Windows build performance at different granularity

Microsoft Corporation

Redmond, WA

SDET Intern, Windows and Devices Group

2014

Built machine learning models to predict Windows build time and analyzed factors are most likely to cause build breaks

Google Inc.

Mountain View, CA

Software Engineering Intern

2013

Developed a JavaScript fuzzer that generates random JavaScript to test Closure Compiler.

Education

University of California

PhD, Computer Science

Santa Cruz, CA

2010 – 2015

- Thesis topic: Understanding and Simulating Software Evolution
- Research areas: Software evolution, software repository mining

Institute of Software, Chinese Academy of Sciences (ISCAS)

MS, Computer Software and Theory

Beijing, China

2007 – 2010

Xiamen University

BS, Software Engineering

Xiamen, China

2003 – 2007
